

Nature Trail Fun!

Choose a plant that you think is interesting. Observe the plant carefully (the color, leaves, stems etc.). Give your plant a name that best describes it*. Place a leaf or leaves under this page and shade over it with your pencil. (*Find out what the real name for your plant is afterwards).

What are the differences between monocots and dicots? Find examples of each, observe and list other differences.

Dicots

Monocots

List all the animals you see on the trail.	Find a mushroom on the trail and draw it.

What Kingdom does a mushroom belong to?

This project is supported by the GEF Small Grants Programme <http://www.sqpbahamas.org/>
